

Sri Harshita Pilla

Dallas, TX | harshitapillasri@gmail.com | (945)-272-7964 | linkedin.com/in/pillasriharshita/ | sriharshitapilla.site

Product Designer with an MS in Human-Computer Interaction and 3 years designing end-to-end for AI-powered, data-dense B2B products, from user research through high-fidelity prototyping.

EXPERIENCE

Community Dreams

Denton, TX (Remote)

Product Designer

11/2025 - Present

- Designed human-in-the-loop AI review flows for a B2B SaaS data automation platform, translating discovery research and user interviews into editable suggestions, confidence indicators, and manual overrides across 3-8s response windows.
- Iterated growth experiments for multi-step onboarding flows using progressive disclosure and inline column previews, reducing source-to-destination field relationship errors before users committed to a run and improving new account activation rates.
- Leveraged Claude Code and Cursor daily to prototype interaction states directly in code, accelerate research synthesis, and translate complex design rationale into clear technical specs for engineering partners, cutting design-to-dev revision cycles across sprint delivery

DePaul University

Chicago, IL

UX Designer

11/2023 - 08/2025

- Improved task completion from 62% to 85% across 24 participants on Maze by redesigning user flows, information architecture, and navigation for a 500+ user internal web platform through 3 iterative rounds of moderated usability testing, A/B testing, and stakeholder feedback.
- Conducted user research sessions including discovery interviews and behavioral synthesis, translating qualitative and quantitative findings into simplified, validated workflows that lifted platform adoption across cross-functional teams.
- Delivered wireframes, high-fidelity Figma prototypes, and component-level UI documentation contributing to the product design system, supporting engineering implementation across a 20-month Agile engagement.

Technoboot

India

UI/UX Designer

10/2022 - 07/2023

- Led end-to-end design for ed-tech platform across onboarding, course discovery, and progress tracking via **user research, information architecture, and interactive prototyping** Figma, increasing learner retention by 60% and reducing navigation friction by 24%
- Improved 30-day user retention by 41% by designing a gamified micro-interaction streak system, validated via A/B testing across 300+ users tracked in Mixpanel, with behavioral cohort analysis confirming sustained engagement lift.
- Audited 120+ WCAG 2.1 AA violations across 8 client projects with wave, Stark, and VoiceOver, built a 200+ component Storybook design system on Figma across 3 product teams with zero critical accessibility defects during final QA for 2 banking clients.

Schaffen Softwares

India

Junior UI Designer

06/2021 - 09/2022

- Designed and optimized interfaces for enterprise B2B and web-based products, addressing cross-platform usability challenges and improving task efficiency.
- Developed brand-aligned design systems and UI kits, enabling scalability, faster handoffs, and consistent user experiences across projects. Applied usability heuristics and brand identity principles to enhance visual clarity and interaction flows, contributing to a 25% increase in user satisfaction.
- Collaborated with stakeholders and end users to translate business needs into research-backed design solutions, ensuring both functionality and brand coherence.

We Storytellers

India

UI Designer

09/2020 - 05/2021

- Designed interactive microsites and digital campaign pages for enterprise B2B IT clients using responsive layout, visual hierarchy, and information architecture, increasing engagement by 30%.
- Improved client content comprehension scores by 25%, translating complex infrastructure concepts into accessible interface patterns and clear data visualization for web-based campaign pages.

SKILLS

Product & Interaction Design: Product Design (Full-Stack, End-to-End), User Experience (UX) Design, User Interface (UI) Design, Interaction Design (IXD), Visual Design, Information Architecture (IA), Consumer App Design (C-Side), Enterprise Design, User Flows, Wireframing, High-Fidelity Prototyping(Interactive, State-Based), Design Systems (Component Libraries, Design Tokens, Pattern Documentation), Accessibility (WCAG 2.1/2.2 AA)

Research :User Research (Qualitative & Quantitative, User Interviews, Usability Testing), A/B Testing, Behavioral Synthesis, Data-Informed Design Iteration, Cross-Functional Collaboration (Product, Engineering, Research, Data), Agile/Scrum, Figma (Advanced Variables, Auto-Layout, Component Variants, Dev Mode), FigJam, Miro, Google Analytics, Mixpanel, Maze, ProtoPie

AI & Technical:AI-Assisted Prototyping (Claude Code, Cursor, Claude API), React/JSX (shipped to production), HTML, CSS, JavaScript, Generative UI Design

PROJECTS

AI Agent Governance & Operations Platform

Figma, React · TypeScript, Next.js, Tailwind CSS

- Designed the authority and provenance framework for an AI agent governance platform: a five-tier permissions model defining when an agent acts independently versus requires human-in-the-loop sign-off, paired with a provenance system distinguishing verified data from AI-generated interpretation to prevent misread outputs in approval workflows.

Stich, AI-Assisted Wardrobe Decision Platform *Figma, AI Interaction Design, Expo/React Native, TypeScript*

- Designed the data-authority and explanation-provenance framework for an AI-assisted wardrobe app: a four-tier hierarchy (user instruction, wardrobe data, session state, AI inference) defining when AI-generated recommendations require code-level validation, paired with a provenance system tagging each recommendation factor as user-stated, contextual, or AI interpretation to prevent AI reasoning from being misread as fact.

EDUCATION

DePaul University , Chicago, IL

09/2023 - 08/2025

Master of Science — Human-Computer Interaction

Relevant Coursework: User-Centered Design, User Research Methods, Interaction Design, Information Architecture, Usability Testing & Evaluation, Human Factors Engineering, Accessibility & Inclusive Design, Mobile Application Design
